

MUHAMMAD ASAD KAMAL SHAH

FULL STACK DEVELOPER

kamalasad57@gmail.com | +923051958933 | Islamabad, Pakistan
www.linkedin.com/in/muhammad-asad-kamal-shah-076053318 | <https://github.com/Asad-coder56>

PROFESSIONAL SUMMARY

Full-Stack Developer with 1.5 years of professional experience developing scalable web applications using React.js, Node.js, Express.js, JavaScript, MySQL, and MongoDB. Experienced in designing RESTful APIs, implementing secure JWT authentication, integrating payment gateways, email services, and real-time communication with WebSockets. Contributed to enterprise applications including CueMetrics, TrueNorth, Recruiter, WatMachinery, and MatchXpert. Passionate about building secure, scalable, and high-performance web applications with clean, maintainable, and efficient code.

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern

MRA Developers

Feb 2025– Apr 2025 | G11/3, Islamabad

Technologies: React.js, Node.js, Express.js, JavaScript, MongoDB, MySQL, REST APIs, JWT, Git, GitHub, Postman

- Assisted in developing full-stack web applications using React.js, Node.js, Express.js, MongoDB, and MySQL.
- Developed responsive React.js user interfaces and integrated them with backend APIs.
- Implemented JWT-based authentication and contributed to database design and optimization.
- Collaborated with senior developers to debug issues, integrate frontend and backend modules, and improve application performance.

Full Stack Developer

MRA Developers

May 2025 – Present | G11/3, Islamabad

Technologies: React.js, Node.js, Express.js, JavaScript, MySQL, MongoDB, Sequelize ORM, REST APIs, JWT, WebSockets, Authorize.net, Nodemailer, Tailwind CSS, Material UI, Git, GitHub, Postman

- Developed and maintained full-stack web applications using React.js, Node.js, Express.js, MongoDB, and MySQL.
- Built scalable RESTful APIs and integrated third-party services, including payment gateways, email services, and WebSockets.
- Implemented secure authentication and role-based access control using JWT.
- Collaborated with cross-functional teams to deliver features, optimize application performance, and resolve production issues.
- Contributed to the development and maintenance of enterprise applications including CueMetrics, TrueNorth, Recruiter, WatMachinery, and MatchXpert, implementing new features, resolving production issues, and improving overall application performance.

PROJECTS

CueMetrics – Sports & Tournament Management Platform

CueMetrics is a full-stack sports management platform designed to streamline cue sports club operations, including leagues, tournaments, table bookings, player rankings, and club management. The platform features role-based dashboards for Super Admin, Organizations, Players, and Venue Owners, along with secure JWT authentication, real-time notifications, email integration, and automated tournament and league management. Built with React.js, Node.js, Express.js, and MySQL, it delivers scalable

performance, seamless frontend-backend integration, and efficient management of sports data.

React.js • Node.js • Express.js • MySQL • Sequelize
ORM • JWT

TrueNorth – Debt Recovery & Settlement Platform

TrueNorth is a full-stack financial technology platform designed to simplify debt recovery, settlement negotiations, and payment processing. It features an Operations Dashboard for managing outreach campaigns, audience tracking, and email communications, along with a secure Client Portal where users can view account balances, negotiate settlements, and make full or installment payments. The platform includes secure role-based authentication, **Authorize.net** payment integration, real-time webhook synchronization, email notifications, and mobile-responsive interfaces. Built using React.js, Node.js, Express.js, and PostgreSQL, it ensures secure, scalable, and efficient management of financial data and payment workflows.

React.js • Node.js • Express.js • PostgreSQL • Sequelize ORM • Authorize.net • JWT

EliteSnooker – Snooker Club & Tournament Management Platform

EliteSnooker is a full-stack sports management platform designed to digitize snooker club operations, tournaments, leagues, and venue management. It includes advanced tournament bracket generation supporting Knockout and Round-Robin formats, league management across multiple seasons and divisions, online table booking, automated player rankings, and a comprehensive match scoring system with frame-by-frame results and highest break tracking. The platform features role-based dashboards for Administrators, Venue Owners, and Players, along with secure authentication, automated tournament scheduling, and real-time updates. Built using React.js, Node.js, Express.js, and MySQL, it ensures scalable performance, seamless frontend-backend integration, and efficient management of tournaments, leagues, and player statistics.

React.js • Node.js • Express.js • MySQL • Sequelize ORM • JWT • Tailwind CSS
